Philosophy and Approach to Counseling

My therapeutic style in working with clients is warm, a little humorous, collaborative, and straightforward. Practicing from cognitive behavioral, solution-focused, and emotion-focused models (and pulling from a variety of others), I believe exploring your relationship between heart and mind can strength core functioning and encourage the change you seek, often leading to a more fulfilled, empowered, and authentic self. My role as therapist is to assist in facilitation to self-discovery and personal growth, to unveil the strength and possibility within you.

While I may offer suggestions for growth or change, the responsibility to grow and change is yours. Please be aware therapy can have both benefits and risks. You may experience uncomfortable feelings such as sadness, guilt, fear, frustration, loneliness, or helplessness. Learning new ways of thinking, behaving, and relating to others may be difficult. While there is no guarantee of what you will experience, research indicates that therapy has many benefits for most clients, often leading to better relationships, solutions to specific problems, and a reduction in feelings of distress.

You may end our counseling relationship at any time. Should either of us feel a referral is appropriate, I may assist with recommendations; the responsibility to pursue referrals or recommendations is yours.

While counseling sessions feel personal, our relationship is professional and limited to our sessions. If we cross paths outside of our sessions, I will not acknowledge you unless contact is initiated by you. Designed for your welfare and privacy, this allows our efforts to be directed toward the counseling process.
